Profile

MERN stack developer focused on building responsive, user-focused web applications. Strong in frontend architecture with hands-on experience in e-commerce functionality and real-world projects. Actively building full-stack skills using Node.js and Express. Passionate about leveraging practical problem-solving and full-stack development to build scalable, business-driven solutions.

Education

University of Agriculture Peshawar

Peshawar, Pakistan

Bachelor of Science in Information Technology (2022-26)

- Ongoing 8th Semester Experience

Frontend Web Developer

- Built responsive, modern Websites React and TailwindCss.
- Developed a full Web Applications Website – **On-Demand Service Marketplace**.

Projects

FYP-Project-Manager (Final Year Project) | MERN Stack, role-based access

- Developed a comprehensive, full-stack online management platform utilizing the MERN stack to manage student proposals and faculty approvals.
- Designed specific workflow features and authentication roles for Admins, Teachers, and Students to ensure real-world usability.
- **Integrated** : The system directly with university processes, and received an official appreciation letter for its implementation.

Quick Repair

- Designed and engineered an on-demand service marketplace to bridge the gap between clients and service technicians.
- Integrated modern frontend components (built with React, Shadcn UI, and Material-UI) with a robust backend and Supabase database infrastructure.
- Implemented secure user authentication, service listing management, and dynamic data-fetching processes.
